Training

Xtensible proudly offers best-in-class integration services for just about every aspect of the utility industry, based on utility experience, industry expertise and a comprehensive understanding of all major third-party systems.

Xtensible is a global leader and participant in initiatives developing utility standards and helping utilities adopt them within the organization. We promote a standards-based approach to system integration, to reduce technical debt and cost of ownership.

Our integration services are unique:

- We understand utility operations, both from the business side and supporting technologies
- We lead our integration services by utilizing the same utility standards we help establish
- We have worked on system integrations from nearly every aspect of the utility space
- We have a proven approach with over two decades of experience
- We adopt our approach by working with you to ensure your success long-term

OUR PROVEN PROJECT IMPLEMENTATION APPROACH

Xtensible's Project Management Office takes on-time and on-budget project delivery very seriously, balanced with high-quality results, always with an eye on the bigger picture and transfer of ownership. We manage the overall project, measure performance of multiple internal, and when necessary, other vendor project teams for the success of the project.

Workstream Integration. Clear Accountability

- PMO Set-up, Governance and Process Roll-out
- Project Integration and Performance Reporting
- Benefit Management, Tracking & Reporting
- Scope, Schedule & Budget Management, Change Control
- Risks / Issues, Dependencies & Decision Management
- Financials and Resource Management
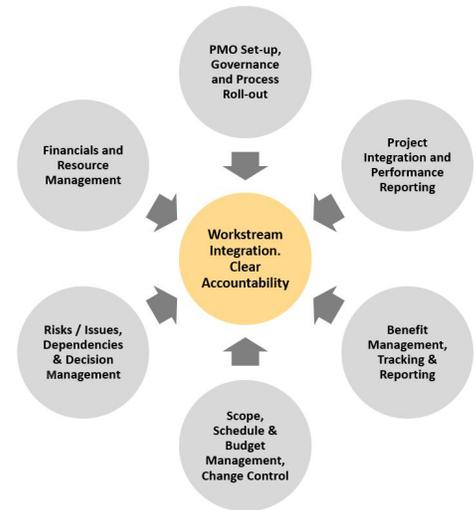

ABOUT XTENSIBLE

Xtensible is a leading US provider of semantic-based products and consulting services for the utility industry with a global client base. We provide strategy and associated architecture consulting, technology consulting, enterprise information management, integration, business intelligence and data analytics services, as well as utility standards training. Our products manage the data lifecycle, from design to run-time. We are a driving force behind the development and implementation of international open standards, that underpin current and future interoperability and technology initiatives. We deliver and empower our clients with sustainable end-to-end solutions in a repeatable and cost-effective manner and strive to become a trusted, reliable partner, putting our clients first.
